Biennial Report

OF THE

Secretary of State

STATE OF MONTANA

FOR THE

YEARS 1919-1920

INDEPENDENT PUBLISHING CO.
HELENA, MONTANA

To His Excellency, S. V. Stewart,
Governor of Montana:

I have the honor to present herewith a biennial report of the activities of this Department for the years 1919 and 1920, in which it will be found that during my incumbency, a marked increase of business in the office is shown. In the corporation department there has been a large increase in the number of instruments filed for record. The fees collected amounted to \$89,681.25 for 1920 as against \$58,352.37 for 1916. In this connection, Section 4413 Revised Codes of 1907, causes much confusion as to the fees to be assessed to foreign corporations upon increases of capital stock. This is the only section of the codes which relates to any fee to be assessed foreign corporations upon increases of capital stock and has been in more than one instance assailed by foreign companies on the ground of unconstitutionality. Following opinions of the Attorney-General, however, I have in each and every case proceeded to enforce this statute. In 1919 there was collected from the J. I. Case Threshing Machine Company \$3,685.00 being the fee demanded by our law for increase of their capital stock. The amount was paid under protest and suit is now pending in the Supreme Court for the return of the fee collected. In 1920 the General Electric Company paid under protest a fee of \$7,368.00 for increase of capital stock, immediately bringing suit to recover through the courts.

The corporations of Swift and Company and Armour and Company were requested to pay the State large amounts for similar cases, but evaded the law by withdrawing from the State as such corporations, and filing another of their many subsidiary corporations, which resulted in the loss of about \$15,000.00 filing fees that could no doubt be collected except for a lapse in the corporation law. This defect should be corrected by proper legislation.

The detailed work of this department has increased by leaps and bounds, but I am pleased to inform you that the work is kept right up to date; the charters are issued and mailed the same day, if articles are received in the morning delivery. Charters for those articles received in the after-

noon delivery are placed in the first mail the following morning. The same service is given to notary public commissions, coal licenses, certificates, ticket agent licenses, certified copies and all correspondence; our rule being "to give the people the service at the time and in the way they desire it."

CORPORATION FEES:

I am enclosing herewith a copy of the Illinois Securities Law which I recommend to your consideration as I have been informed by the Secretary of that State that he has not only succeeded in increasing his revenue from about \$600,000 to over \$3,500,000 per annum, this, after the fees were reduced about one-half and the new rate being only 1-20 of one per cent. This law has also been the means of driving most of the "Blue Sky" corporations out of the State to the great satisfaction and benefit of the legitimate corporations.

In order that our State revenue may be further increased I desire to call your attention to Section 165 Revised Codes of Montana and to recommend that the rate for corporation filing fees be made 1-20 of one per cent (which is 50c per \$1,000), on the authorized capital stock for either domestic or foreign corporations with minimum charge of \$40.00 for the smaller corporations, instead of the graduated scale now in use.

For the further increase of revenue, I recommend the following fees:

Instrument	Present Rate	Should Be
Notarial commissions	\$7.00	\$10.00
Coal licenses	\$1.00	\$ 3.00
Ticket agent's license	\$1.00	\$ 2.00
Increase of capital stock.....)		
Certificate of Incorporation		
Decrease of capital stock.....)		
Change of name	\$3.00 each	\$ 5.00
Change of Principal place of business)		
Certificate of continuation		
Making capital stock assessable.....)		

I further recommend the following:

Sections 4210 to 4220 with amendments covering co-operative corporations should be repealed.

There seems to be a conflict in the corporation laws, to wit: Revised Codes, Sections 3827, 3828, and 3894 relative to the procedure of increase or decrease of capital stock, etc. I believe that a statute establishing uniform procedure for affecting change of name, increase or decrease of capital stock, making stock assessable or non-assessable, change of place of business, continuance of existence should be adopted and include therein an additional requirement that all original papers should first be filed with the Secretary of State and a copy with the County Clerk and Recorder. Under the present laws this office has possession only of a certified copy whereas in numerous cases we are called upon to certify the original instrument.

Chapter 37 of the Fourteenth Session approved February 27, 1915, should be repealed. I am prepared to suggest a substitute for this law if desired.

A law should also be given us to cover foreign and domestic corporations desiring to file where par value of the capital stock is not definitely stated in the Articles of Incorporation.

I earnestly recommend the repeal of Chapter 18, Laws of the Fifteenth Extraordinary Session, the same being "An Act to Provide a Method of Voting at any General Election Held Within the State of Montana by Duly Qualified and Registered Electors Absent from the County Within Which Such Electors Reside, and who are in the Actual Military Service of the State of Montana, or the Government of the United States or in the Actual Service of the National Red Cross Association, the Young Men's Christian Association, The Young Women's Christian Association, the Knights of Columbus, or any Similar Organization Auxiliary to the Army and Navy and Recognized by the Government of the United States, and Providing Penalties for the Violation of the Provisions of this Act."

I further recommend that Sections 8147 and 8175 Revised Codes of 1907 be directly repealed. It is considered that these statutes are impliedly repealed by enactment of the so-called Corrupt Practices Act, which was initiated and passed by the people at the General Election of 1912. This latter act does not contain a repealing clause, hence my rec-

ommendation in this respect. These sections of the Codes have caused considerable confusion to the public and to this office.

ELECTION COSTS:

The elimination of the campaign book, which was done by the last legislature at my suggestion, affected a saving of over \$50,000 of the expenses of this office for the fiscal year.

There were six initiative and five referendum measures submitted of which three initiative and five referred measures were completed and placed upon the ballot; the law requires that each of these laws shall be printed in a separate copy and one copy mailed to each registered voter; there were 261,258 names certified to this office by the County Clerks making a total of 2,351,322 pamphlets printed, which cost the State Printing Fund over \$40,000 to which must be added the cost of mailing by the County Clerks and paid for by the County at the necessary expense of approximately \$20,000 more, and only two initiative and one referendum measures were passed.

There were three Constitutional Amendments passed by the Legislature which must be published for twelve weeks in each county prior to the General Election, the cost of which will be approximately \$15,000. Two of these amendments failed in passage.

MOTOR VEHICLE DEPARTMENT:

The registration of Motor Vehicles continues to show a marked increase, both in the number of vehicles registered and the revenue collected over the preceding year.

Under the present system 25% of the money from this fund is returned by this office to the originating county, but the cost of the necessary accounting and bookkeeping causes me to recommend that the law be amended to eliminate this feature which will affect a saving of probably more than \$2,500.00.

I also recommend that all funds paid for the violation of the motor vehicle and road laws, be paid into the road fund to be used for their maintenance.

A fee of \$2.50 should be charged for each "Trailer."

The driving of motor vehicles by children under eighteen years of age should be prohibited by State law.

A law requiring the examination and licensing of automobile mechanics should be enacted for the protection of owners against inexperienced workmen who are not competent to act as mechanics; the examinations could be made at Bozeman by the College faculty without any extra expense to the State.

Some suggestions have been made to this office relative to the use of a permanent automobile plate with a small identification badge or tag indicating the year. After a careful investigation I find that California, Colorado, Michigan and in fact nearly every State except Wyoming and Washington, who only adopted that system last year, have discontinued this system as too complicated and too expensive; the two latter states expect to repeal the law this winter. The Secretary of the State of California informed me that the badge system cost them \$110,000 more than it would have cost to furnish a lighter plate each year.

After the new plates are received from the manufacturer and the proper address attached to each plate, they are placed in mail sacks and marked for each town or mail route and hauled direct to the depot, thus saving delay of rehandling at the main postoffice, which heretofore has caused weeks of delay due to the big rush the first few days after the arrival of the plates. In 1918, 1919 and 1920 the delay in making the first delivery was due entirely to manufacturing conditions which could not be avoided by either the manufacturer or the State. We expect an earlier delivery this year however, and if the plates arrive on time we will have them in the mail the third day after the completed application is received in this office; our system requires this and there never has been delay in getting the plates in the hands of the postoffice department except with applications that must be returned for correction, amounting to nearly 30% of all those received and thus greatly increasing the cost of mailing, labor, and postage, beside many days' delay in getting the plates on the car.

INSURANCE ON CAPITOL BUILDING AND CONTENTS:

The State carries no fire insurance on the Capitol Building or its contents. The building is called "FIRE PROOF": so was the \$5,000,000 Capitol Building at Albany, New York, which was destroyed by fire a few years ago. The

insurance rate on this building is very low, being only \$1.40 per \$100 for a three year period, under the co-insurance plan and the State should be protected by at least \$1,000,000 insurance.

WEIGHTS AND MEASURES DEPARTMENT:

This department is handicapped by the lack of funds for the handling of so vital a matter. The County Auditors who are now deputy inspectors are doing good work, but of course greatly limited. I recommend that this law be amended and broadened as the question of correct weights is of interest to every individual in the State.

CONSTITUTIONAL CONVENTION PROCEEDINGS:

These debates and proceedings have been edited, indexed, copies prepared for printing, and a call for bids has been published. We hope to have the bound volumes of about 2,000 pages each, ready for distribution the coming summer.

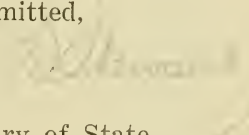

OIL INSPECTION DEPARTMENT:

This department was created by the Sixteenth Legislative Assembly and has proven the wisdom of its creation because of the higher standard of oils and gasoline now being marketed. Our records show that the quality of oils, kerosenes, and gasoline now being sold in Montana to be of much better grade than formerly offered, and quite superior to that being sold in Idaho, Wyoming, and Colorado. Samples are secured and inspection made not only at the wholesalers' stations, but at every retailer's station along the railroad lines of the State. When this work was started it was found that a large quantity of kerosene and gasoline was of such low standard as to be dangerous. At many points we found kerosene being sold for illuminating purposes on which the "flash" point was between 90 and 100°. We found it necessary to have these low grade products taken from the market entirely. This was promptly done and I am pleased to say that we have received loyal support from all shippers, wholesale and retail. The refineries are also giving loyal support in keeping up the quality of the statutory standard. A detailed report of the tests made by the chemical department is being printed in pamphlet form and will be ready for distribution in a few weeks. We are informed by the

Bureau of Mines at Washington, D. C., that a new standard is soon to be established by the Federal Government. When this is done we will correct our standard to conform therewith. The expense of conducting this department has been negligible as compared with the service rendered to the consumer.

Absence from this report of any estimates for the various appropriations covering the years 1921 and 1922 is explained by the fact that these estimates have been embodied in a report to the State Board of Examiners in accordance with the State Budget Law, Chapter 205, of the Laws of 1919, Regular Session.

Respectfully submitted,

Secretary of State.

Helena, Montana, December 31, 1920.
(SEAL)
